

Rogers Fire Department Standard Operating Procedures

Policy Title:	Mutual Aid Standing Orders		
Policy Number:	411	Volume:	Command
Approved By:	Tom Jenkins	Last Updated:	April 2013
CFAI Reference:	10A.3	CAAS Reference:	N/A
Revision Summary:	Created – May 2012 Update – April 2013 Clarification to radio procedures		

PURPOSE

The purpose of this policy is to establish a standardized approach for Rogers Fire Department units when responding to out-of-city mutual aid requests.

POLICY

Upon receiving a request for a mutual aid response, RCD will immediately notify the on-duty City Wide Tour Commander. The City Wide Tour Commander is responsible for determining whether there are sufficient fire department resources available to fill the mutual aid request while still maintaining adequate coverage within the city of Rogers. The City Wide Tour Commander must keep in mind that the primary responsibility of the Rogers Fire Department is to provide emergency protection within the corporate city limits of Rogers; all mutual aid requests are secondary to that purpose.

Initial Assignments for Mutual Aid Responses:

Mutual Aid Structure Fire

The initial assignment for a mutual aid structure fire to a neighboring volunteer department, such as Little Flock or Beaver Lake, shall consist of the on-duty Battalion Chief and the two closest fire companies. The primary function of the second arriving company will be to establish the Rapid Intervention Group. At defensive fires in which no structures are threatened the second company should return to the city as soon as possible.

The initial assignment for a mutual aid structure fire to a neighboring career department, such as Bentonville or Lowell, shall consist of the single closest fire company.

Mutual Aid Grass Fire

The initial assignment for a mutual aid grass fire shall consist of the closest fire company. The City Wide Tour Commander may authorize the dispatch of a

brush pumper and companion engine company to substitute or compliment the closest fire company.

Mutual Aid EMS Response

The initial assignment for a mutual aid EMS response shall consist of the closest medic unit. If the response is for an MVA with Extrication to a neighboring volunteer department, the closest extrication-capable fire company will respond along with the medic unit.

Mutual Aid Hazardous Materials Response

The initial assignment for a mutual aid hazardous materials response shall consist of Task Force 5 (Ladder 5, Rescue 5, and Medic 5), the closest engine, and the on-duty Battalion Chief. If there are known patients and the response is to an area where the RFD is the primary EMS provider the closest additional medic unit will be sent.

Mutual Aid Rescue Response

The initial assignment for a mutual aid rescue response shall consist of the closest engine, Ladder 5, Rescue 5, the closest medic unit (in areas where the RFD is the primary EMS provider), and the on-duty Battalion Chief.

Mutual Aid Aircraft Emergency at XNA

The initial assignment for a mutual aid aircraft emergency at XNA airport shall consist of the closest engine, the two closest medic units, Rescue 5, and the on-duty Battalion Chief.

The standard mutual aid response for any call type may be altered by the City Wide Tour Commander based on the needs of the requesting agency and resource availability.

Response Procedure

When dispatched for a mutual aid response, all responding units should respond using the MDC (where equipped) or verbally on the RCD primary channel. The unit, or Battalion Chief if multiple units, will switch to the appropriate channel of the agency requesting mutual aid and notify them of the Rogers Fire Department units that are responding.

Example: "Rogers Battalion 1 to Cencom, Rogers Battalion is responding to 949 Rader Rd and will be monitoring this channel."

All responding units should switch their portable radios to the appropriate channel of the agency requesting mutual aid while continuing to monitor RCD on the mobile radio. If Battalion 1 is not on the response the responding unit will make the response announcement on the appropriate channel. Upon arrival at

the scene each unit is responsible for notifying both RCD and the requesting agency of their arrival.

The following channels will be utilized for mutual aid responses:

Department	Channel	Radio Zone and Designation
Avoca FD	FireNet Northeast tower	Zone 2 - FIRENE
Beaver Lake FD	FireNet Northeast tower	Zone 2 - FIRENE
Bella Vista FD	Bella Vista FD Dispatch	Zone 2 - BVFD1
Bentonville FD	Bentonville FD Dispatch	Zone 2 - BFD1
Cave Springs FD	FireNet Southwest tower	Zone 2 - FIRESW
Hwy 94 FD	FireNet Southeast tower	Zone 2 - FIRESE
Little Flock FD	FireNet Northeast tower	Zone 2 - FIRENE
Lowell FD	Lowell FD "Tac41"	Zone 2 - LOW FD
NEBCO FD	FireNet Northeast tower	Zone 2 - FIRENE
Pea Ridge FD	FireNet Northeast tower	Zone 2 - FIRENE
Piney Point FD	FireNet Southeast tower	Zone 2 - FIRESE
Rocky Branch FD	FireNet Northeast tower	Zone 2 - FIRENE
Springdale FD	Springdale FD Dispatch	Zone 2 - SPR FD1
XNA	FireNet Southwest tower	Zone 2 - FIRESW

Scene Responsibilities

Upon arrival at the scene, Rogers Fire Department personnel should not begin operating until they confirm that a NIMS-compliant incident command system is in place. Rogers Fire Department personnel should make every effort to work cooperatively with the agency requesting mutual aid, but are not obligated to engage in any task that they believe to be unsafe or improperly managed.

If a Rogers Fire Department unit is the first unit to arrive at the scene of a mutual aid incident, they should provide a scene size-up on the requesting agency's frequency and establish the incident command system. It is not intended that Rogers Fire Department personnel function as the long-term Incident Commander at mutual aid responses. Transfer of Command to a qualified member of the agency having jurisdiction should occur as soon as practical.

It is expected that Rogers Fire Department personnel will be utilized at mutual aid incidents for aggressive operations such as offensive fire attacks, patient treatment and transportation, and hazardous materials mitigation. Whenever possible, RFD personnel should use equipment off of the requesting agencies apparatus and should park in a position that prevents them from being blocked in

at the scene. Once the scene is under control, RFD personnel should return to the city.

The primary purpose of the responding Battalion Chief will be to ensure that a NIMS-compliant incident command system is in place and that the incident is being operated in a safe and controlled manner. Once this is accomplished the Battalion Chief may return to the city at his discretion.

Policy Revision

This policy shall be discussed and reviewed at least annually in meetings with mutual aid partners. In addition, this policy may be reviewed at will should conflict or confusion arise from an incident.
